How to Use This Table:

1. Before comparing providers, determine your specific requirements. What currencies and payment methods are essential for your target market? What systems do you use?
2. Research payment providers and gather info on their features, pricing, and customer reviews.
3. Fill in the table focusing on the features that are important to your business.

Remember that this is a starting point. You may need to add or remove features based on your specific needs and priorities. Don't hesitate to contact providers directly to get detailed information and ask questions.
